

Lab Testing 2 – CSE332

Software Testing and Validation

Abdelrahman Ibrahim Mohamed Ismail – 19P3049

Question 1.A Code:

```
public void even2(){
   CheckEvenOdd x = new CheckEvenOdd();
@Test(expected = IllegalArgumentException.class)
public void negative(){
```

Output:

```
| Service | Manager Code | Analyze | Beface | Daid | By | Took | VS | Window | Beface | Daid | By | Took | VS | Window | Beface | Daid | By | Took | VS | Window | Beface | Daid | By | Took | VS | Window | Beface | Daid | By | Took | Code | Co
```

Question 1.B code:

```
public class MaxMinElements { public int Max(int[] x) {
    int maxElement=x[0];
    for(int i=0; i<x.length; i++) {
        if(x[i]>maxElement) {
            maxElement=x[i];
        }
    }
    return maxElement;
}

public int Min(int[] x) {
    int minElement=x[0];
    for(int i=0; i<x.length; i++) {
        if(x[i]<minElement) {
            minElement=x[i];
        }
    }
    return minElement;
}

import org.junit.Test;
import static org.junit.Assert.*;
public class MaxMinElementsTest {
    @Test
    public void test1() {
        MaxMinElements y = new MaxMinElements();
        int[] x = {1,2,3,4,-44,111,7,8,9};
        assertEquals(-44,y.Min(x));</pre>
```

```
assertEquals(111, y.Max(x));
}
@Test
public void test2(){
    MaxMinElements y = new MaxMinElements();
    int[] x = {1,2,3,4,0,111,7,8,1100};
    assertEquals(0,y.Min(x));
    assertEquals(1100, y.Max(x));
}
@Test
public void test3(){
    MaxMinElements y = new MaxMinElements();
    int[] x = {8,9};
    assertEquals(8,y.Min(x));
    assertEquals(9, y.Max(x));
}
@Test
public void test4(){
    MaxMinElements y = new MaxMinElements();
    int[] x = {1};
    assertEquals(1,y.Min(x));
    assertEquals(1,y.Min(x));
    assertEquals(1,y.Min(x));
    assertEquals(1,y.Min(x));
    assertEquals(-1,y.Min(x));
    assertEquals(-1,y.Min(x));
    assertEquals(210, y.Max(x));
}
```

Output:

```
| February | February | Mandatchemoralized | February |
```

Question 2

```
class StateChartTest {
        public void setup(){
           mainObj = new StateChart();
res[0]); assertEquals("TIME", res[1]); assertEquals("2000-1-1", res[2]);
           assertEquals("0:0", res[3]);
```

```
assertEquals("0:1", res[3]);
public void ECtest9() { mainObj.input('a');
   assertEquals("1:1", res[3]);
```

```
assertEquals("UPDATE", res[0]);
```

```
public void ECtest14() { mainObj.input('a');
public void ECtest16() { mainObj.input('a');
```

```
@Test
```

```
@Nested class ADUP{
       StateChart mainObj;
        public void setup(){
        public void ADUPTest1() {
            assertEquals("0:0", res[3]);
        public void ADUPTest2() { mainObj.input('c');
            String[] res = mainObj.input('b'); assertEquals("UPDATE",
        public void ADUPTest3() { mainObj.input('c');
            assertEquals("0:2", res[3]);
        public void ADUPTest4() { mainObj.input('c');
        public void ADUPTest5() { mainObj.input('c');
assertEquals("2000-1-1", res[2]);
```

```
public void ADUPTest6() { mainObj.input('c');
public void ADUPTest7() { mainObj.input('c');
public void ADUPtest8() { mainObj.input('c');
    assertEquals("2:2", res[3]);
public void ADUPTest9() { mainObj.input('c');
public void ADUPTest10() { mainObj.input('c');
```

```
public void ADUPTest11() { mainObj.input('c');
public void ADUPTest12() { mainObj.input('c');
public void ADUPTest13() { mainObj.input('c');
```

```
public void ADUPTest14() { mainObj.input('c');
public void ADUPTest15() { mainObj.input('c');
```

Output:
